

For Mobile Network Operators and tower owners suffering from the high operating expenses and intermittency of remote power supply, UGE Fusion™ offers an end-to-end energy solution that provides more reliability at a fraction of the cost.

Unlike other integrated energy products, UGE Fusion™ delivers site evaluation, system design, and implementation in one streamlined solution.

We have the ability to accurately evaluate the renewable energy resource, supply the technology, finance the project, and operate & maintain the sites - all under one roof.

The solution is increased reliability, decreased operating costs, and peace of mind.

The solution is renewable energy.

RENEWABLE ENERGY
SOLUTIONS FOR TELECOMS

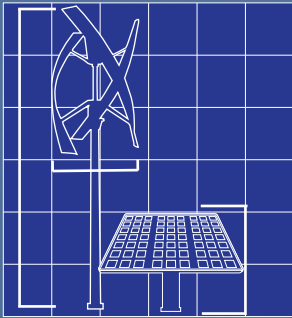

How it Works

REMOTE SITE EVALUATION

- Renewable resource assessment
- Proprietary energy modeling
- Site constraints
- Network optimization

RENEWABLE ENERGY SYSTEM DESIGN

- Site layout
- Wind & solar systems
- Engineering design
- Technology integration
- Cost/benefit analysis

PROJECT IMPLEMENTATION

- Financing
- Installation
- Monitoring through ViewUGE™
- Operation & maintenance
- Long-term support
